SUMMARY

A dedicated and skilled IT professional with expertise in web development and backend technologies, seeking to contribute to a forward-thinking organization. Eager to leverage my comprehensive skill set in HTML, CSS, JavaScript, Python, Django, and more to drive innovation and deliver exceptional results while fostering professional growth and career advancement.

SKILLS

- **FrontEnd:** HTML,CSS, Bootstrap, Javascript, React.js
- **BackEnd:** Python, Django
- **Database:** MySQL
- **Database Mangenent:** PHPMyAdmin
- **Other:** Json,Rest Api
- **Version Control System:** Git
- **IDE:** Sublime Text, VS Code
- **API Clint:** Postman

EXPERIENCE

Mashupstack

Thiruvananthapuram,India

Intern Trainee

Jun 2025 - Jan 2026

- During my Python fullstack internship, I developed web applications using Mysql, Javascript, React.js, A dedicated and skilled IT professional with expertise in web development and backend technologies, seeking to contribute to a forward-thinking organization. Eager to leverage my comprehensive skill set in HTML, CSS, JavaScript, Python, Django, and more to drive innovation and deliver exceptional results while fostering professional growth and career advancement. Python and Django. I designed React.js interfaces,build RESTfullAPIs with Python and Django ,and managed databases in Mysql. I collaborated on Git and GitHub for version control and participated in code reviews, enhancing my full-stack development skills and problem-solving abilities.

PROJECT

Favorite-Hospital Appointment Booking - FullStack

Tech Use: React, JavaScript, HTML, CSS, Python, Django REST API, Redux, Axious, Bootstarp

overview: Developed a full-stack Hospital Appointment Booking System using a React frontend and a secure backend. The application enables patients toregister, authenticate, view doctor profiles, book and manage appointments,and update account details. An admin portal allows hospital staff to manage doctors, users, appointments, andgenerate reports such as most-viewed doctors. The system features a responsive UI, secure authentication, optimized performance, and scalability for future enhancements.

Key Features: The system includes patient registration and login, doctor profiles and specialization, online appointment booking, appointment and patient profile management, an admin dashboard, doctor and user management, most-viewed doctor reports, secure authentication, a responsive user interface, optimized performance, and scalability for future enhancements.

Git Respo: https://github.com/dennis142505/mainproject.git

URL Shortner-Django

Tech Use: Django,Bootstrap, JavaScript, HTML, CSS,

overview: The URL Shortener is a web application built using Django that allows users to convert long URLs into short, easy-to-share links. When a user clicks the shortened link, they are redirected to the original URL. The system also tracks the number of clicks for each shortened link.

Key Features: User authentication,URL shortening, automaticredirection, userdashboard,click tracking, URL management, unique short code generation, and creation date tracking.

Git Respo: https://github.com/dennis142505/urlshortner.git

Daily Water Intake-React

Tech Use: React,JavaScript,HTML, CSS, Bootstrap,

overview: TheDaily Water IntakeTrackeris aReact-based web application that helps users record,track,and monitor their daily water consumption. It allows users to log the amount of waterthey drink each day, prevents duplicate entries, and displays their intake history in an organized list.

Key Features: User login, daily water entry with auto date, one entry per day limit, intake history list, and a clean Bootstrap-styled responsive interface.

Git Respo: https://github.com/dennis142505/water-intake.git

EDUCATION

Manonmaniam Sundaranar University - - -

BCA in Computer Science
Nesamony Memorial Christian College **2022 - 2025**

GHSS School
St.Aloysius Higher Secondary School,
Marthandamthurai **2021 - 2022**

CERTIFICATIONS

- Full Stack Web Development in Python//Django/React from MashupStack **- 2026**
